Art Unit: 2164

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1, 3-7, 10-13, 24, 26-30, 33-36, 47, 51, 56-59, 62-63, 72-74 and 77-78 are rejected under 35 U.S.C. 103(a) as being unpatentable over Green (U.S. Patent 6,449,598) in view of Byrne (U.S. Patent 6,490,619) and further in view of Mayaud (U.S. Patent 5,845,255).

The reasons for this rejection were set forth in the office action of March 2, 2006 and are hereby incorporated by reference.

Remarks

Applicant's arguments have been considered. Applicant argues that neither Green nor Byrne and Mayaud teach the feature of receiving a search request containing a criteria, where the criteria is a search category. Examiner finds these features to be taught in the Green reference.

Col. 7, lines 42-46 of Green clearly refer to the input of a search containing search criteria. Claim 1 further states that the criteria is a "category", but does not state what the categories are, or give even the slightest hint as to what the categories might be. Accordingly, any criteria input to the system will correlate to a category, until such time as applicant further defines what the categories actually are.

This office action follows the filing of an RCE and is made non-final.
